

## MIRACULOUS BEAUTY

Chemical peels. Laser treatments. Lifts and tucks. Once the beauty secrets of the elite, they're now available to everyone. Just in time, the makers of the legendary Crème de la Mer introduce The Concentrate, a revolutionary treatment that helps complement skin's own natural healing process.

### THE CRÈME

Crème de la Mer—the original miracle—was developed years ago, when NASA aerospace physicist Dr. Max Huber suffered severe burns after an experiment exploded in his face. Taking matters into his own hands, Huber utilized the ancient science of bio-fermentation, combining sea kelp, essential vitamins and minerals to create a nutrient-rich *Miracle Broth™*. The results speak for themselves: In a short time skin becomes softer, firmer, looks virtually creaseless. Aging lines and pores are noticeably less visible. Even the driest of complexions are restored.

### THE CONCENTRATE

Crème de la Mer's *Miracle Broth™* is concentrated in this remarkable new formula that helps skin prepare for pending procedures. It even helps complement skin's own natural healing process. The appearance of scarring resulting from surgery and burns is noticeably improved. Irritation and redness are visibly diminished. Skin feels soft, supple and flexible, profoundly restored.
